- Altar Decorations are just like fresh flowers - keep refrigerated until ready to arrange. DO NOT OPEN THE PLASTIC BAGS UNTIL READY TO USE. To help the Altar Décor leaves stay fresh when arranging, simply cut each stem at a 45 degree diagonal just above the end of the stem and place in fresh water or wet floral foam. Prior to arranging the decorations, cut the stems of the Fan Altar Décor and place in water to make the fan leaf open.
- Once the décor has been arranged to your liking, keep the stems in water to maintain their green and fresh appearance
- To keep the palm strips fresh, do NOT open the plastic bags until you are ready to hand the palms out to the congregation.
- Keep sealed bags of palms in a cool area. A florist, restaurant or convenience store may have a large refrigerated space you can store the palms in until Palm Sunday.
- Check the contents of the box to make sure the order is correct.
- People who are not refrigerating their palms should open each box and take three or four UNOPENED plastic bags of palms out of the box. When the palms are enclosed in plastic and packed in a box, heat may begin to build up in the box between the plastic bags. Any perishable plant material will begin to break-down if there is heat present.
