IMPACT OF TRAUMA ON FAITH*

After the experience of a traumatic event, persons may be impacted emotionally, intellectually, physically and spiritually. There are three possible outcomes as a result of this spiritual challenge:

- Faith is reaffirmed
- Faith is rejected
- Faith is transformed

Spiritual tools are an essential part of the Pastoral Response to trauma or extreme stress:

- Meaning and purpose are critical to stress resistance
- Faith and religion are a source of emotional support
- Faith and religion can be a starting point to regaining purpose and to begin problem solving
- Measures of participation in a faith based community are strong predictors of and positively relate to the quality of life

The Power of Prayer in Crisis:

- A source of safety and security, ventilation and validation, prediction and preparation
- A source of comfort and stress moderation
- A source of connection to a broader community of faith
- Reaffirms a belief in order, meaning in the world
- A source of communication
- A source of spiritual processing

The Power of Ritual in Crisis:

- A source of social integration and support
- Helps to retain communication with loved ones
- May integrate tragedy into belief systems
- May become traditions for later generations
- Reminds people of their faith and belief systems

Spiritual Issues that May Arise

- Why me?
- Is this an act of God’s will?
- Why does God hurt little children, or allow them to be hurt?
- Why doesn’t God answer my prayers?
- Why is there evil in the world?
- How can I forgive? or Will God forgive me for what I feel?
- What did I do to deserve this?
